

Harry Moss 2020 Meet Director's notes

Welcome back to Harry Moss Park and Preserve. Most of what you need to know is covered in the instructions on the Harry Moss DIY-O Event Page and in the Course Setter's Notes.

The trail system on the map has been checked and updated but some of the vegetation details have not been revised, particularly in areas that are distant from the controls. Mowing often occurs in the fall and may happen any day, so be aware that the grasslands could be more or less runnable than shown on the map.

The old railroad grade on the southwest edge of the map has been turned into the Sopac Trail, a nicely paved hike and bike path, comparable to White Rock Creek Trail but straighter. It has four foot high railings in places where the embankments are steep. The railings limit access from the woods in some places but they are climbable. The railings are not mapped yet.

Parking is available along Arborside Drive, south of Royal Lane. (Watch out for the speed bumps.) The closest parking to the Start/Finish point will be between Moss Trail and Westwind Court. Look for two green trash cans on the west side of Arborside and follow the trail west about 100 meters to the point described in the CS notes.

In the spirit of DIY, the 'all control' map and cluesheet are available on the download page so participants have the option to run the event as a Score-O.

If you find ribbons for a "Special Item", but the item itself is missing, please contact the course setter. (Please do not remove any of the 'Special Items'.)

Remember to print off your own map and cluesheet and bring your own water. Don't expect to find any toilet facilities in the park. Some water fountains are working as of the week before the event.

Have fun and be safe!

Stan Darnell, *meet director and assistant course setter*
